CHARLESTON DISTRICT, CORPS OF ENGINEERS
69A HAGOOD AVENUE
CHARLESTON, SC 29403-5107

September 22, 2020

Regulatory Division

Mr. Chad Long
South Carolina Department of Transportation
P.O. Box 191
Columbia, South Carolina 29202
LongCC@scdot.org

Dear Mr. Long:

Enclosed is your Department of the Army Permit SAC-2015-01080. It authorizes you to perform the work specified in the attached drawings. This permit is issued under provision of Federal laws for the protection and preservation of waters of the United States.

Please notify this office promptly, in writing or via email to Stephen A. Brumagin, Project Manager, when you start and complete work. Be aware a special condition is included in this permit requiring a copy of the permit and drawings be available at the work site during the entire time of construction.

Sincerely,

A handwritten signature in black ink, appearing to read "Travis G. Hughes".

Carolina Crossroads Permitted Plans
PH Timber PRM Permitted Plans
Notice of Commencement or Completion

DEPARTMENT OF THE ARMY PERMIT

Permittee: **South Carolina Department of Transportation**
C/O Mr. Chad Long

P.O. Box 191
Columbia, South Carolina 29202

Permit No: **SAC-2015-01080**

Issuing Office: **CHARLESTON DISTRICT**

NOTE: The term "you" and its derivatives, as used in this permit, means the permittee or any future transferee. The term "this office" refers to the appropriate district or division office of the Corps of Engineers having jurisdiction over the permitted activity or the appropriate official of that office acting under the authority of the commanding officer.

You are authorized to perform work in accordance with the terms and conditions specified below.

Project Description:

The authorized work consists of the improvement of existing roadways and Interstate (Interstate 20, 26 & 126), construction of additional travel lanes and updates/improvements to the existing Interstate Interchanges within the Carolina Crossroads Corridor Improvement Project area. In detail, these construction activities will include the placement of fill within 2.76 acres of wetlands, conduct mechanical land clearing in 1.66 acres of wetland and the placement of fill/rock/structures in 8,136 linear feet of stream, 2,538 linear feet of morphologic impact and 2,295 linear feet of stream relocation (total 12,969 linear feet).

This permit will also authorize the following activities/impacts with waters of the U.S. in the PH Timber PRM site in Newberry County:

- 2,525 linear feet of in-stream impacts within several tributaries within the PH Timber site. These in-stream activities include placement of rock/fill/woody material for streambank stabilization/reinforcement, placement of rock/fill for development of riffles or for altering the elevation of the stream channel to modify stream grade and removal of areas of accumulated gravel bars.
- Construction of several reaches of new restored stream channel (off-line) within upland areas. This will include creation of new stable, functioning stream channel and placement of fill/rock in 15,354 linear feet of existing stream channel once flow has been directed into the newly constructed channel.
- The replacement of two existing roadway culverts with similarly sized culverts and will include the placement of 155 linear feet of rock riffle/pool within three tributaries adjacent to the culvert replacements.
- Cut/fill in 0.004 acre of wetland associated with authorized in-stream mitigation construction.
- Draining of an existing 0.39-acre impoundment within the PH Timber PRM site. Once this impoundment is drained, the impoundment area will be filled and stabilized.

All work is to be completed in accordance with attached drawings entitled:

SHEETS 1-40, 42, 44-63, 65-67 AND 74-78, "CAROLINA CROSSROADS PROJECT ID NO. P027662 RICHLAND COUNTY, SC LEXINGTON COUNTY, SC APPLICATION BY SCDOT, NOVEMBER 6, 2019";

SHEETS 41 & 43 AND 69-73 "CAROLINA CROSSROADS PROJECT ID NO. P027662 RICHLAND COUNTY, SC LEXINGTON COUNTY, SC APPLICATION BY SCDOT REVISED JULY 15, 2020";

SHEET 64 & 68, "CAROLINA CROSSROADS PROJECT ID NO. P027662 RICHLAND COUNTY, SC LEXINGTON COUNTY, SC APPLICATION BY SCDOT, REVISED AUGUST 27, 2020";

and

"Carolina Crossroads Mitigation Site-PH Timber Tract Newberry County, South Carolina", Sheets 1.1 to 1.9, Sheets 2.1.1 to 2.1.32 and Sheets 2.2.1 to 2.2.19, dated May 20, 2020

Project Location:

This project is located within a 28,800-acre project area around the intersections/interchanges of Interstate 20 (I-20), Interstate 26 (I-26) and Interstate 126 (I-126) in Lexington and Richland Counties, South Carolina. (Latitude 34.036752 N, Longitude 81.110618 W (NAD83)).

General Permit Conditions:

1. The time limit for completing the work authorized ends on **September 30, 2035**. If you find that you need more time to complete the authorized activity, submit your request for a time extension to this office for consideration at least one month before the above date is reached.
2. You must maintain the activity authorized by this permit in good condition and in conformance with the terms and conditions of this permit. You are not relieved of this requirement if you abandon the permitted activity, although you may make a good faith transfer to a third party in compliance with General Condition 4 below. Should you wish to cease to maintain the authorized activity or should you desire to abandon it without a good faith transfer, you must obtain a modification of this permit from this office, which may require restoration of the area.
3. If you discover any previously unknown historic or archeological remains while accomplishing the activity authorized by this permit, you must immediately notify this office of what you have found. We will initiate the Federal and state coordination required to determine if the remains warrant a recovery effort or if the site is eligible for listing in the National Register of Historic Places.
4. If you sell the property associated with this permit, you must obtain the signature of the new owner in the space provided and forward a copy of the permit to this office to validate the transfer of this authorization.
5. If a conditioned water quality certification has been issued for your project, you must comply with the conditions specified in the certification as special conditions to this permit. For your convenience, a copy of the certification is attached if it contains such conditions.
6. You must allow representatives from this office to inspect the authorized activity at any time deemed necessary to ensure that it is being or has been accomplished in accordance with the terms and conditions of your permit.

Special Permit Conditions:

See Appendix A, pages 6 through 11.

Further information:

1. Congressional Authorities: You have been authorized to undertake the activity described above pursuant to:

- Section 10 of the Rivers and Harbors Act of 1899 (33 USC 403)
- Section 404 of the Clean Water Act (33 USC 1344)
- Section 103 of the Marine Protection, Research and Sanctuaries Act of 1972 (33 USC 1413)

2. Limits of this authorization.

- a. This permit does not obviate the need to obtain other Federal, State or local authorizations required by law.
- b. This permit does not grant any property rights or exclusive privileges.
- c. This permit does not authorize any injury to the property or rights of others.
- d. This permit does not authorize interference with any existing or proposed Federal project.

3. Limits of Federal Liability. In issuing this permit, the Federal Government does not assume liability for:

- a. Damages to the permitted project or uses thereof as a result of other permitted or unpermitted activities or from natural causes.
- b. Damages to the permitted project or uses thereof as a result of current or future activities undertaken by or on behalf of the United States in the public interest.
- c. Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity authorized by this permit.
- d. Design or construction deficiencies associated with the permitted work.
- e. Damage claims associated with any future modification, suspension, or revocation of this permit.

4. Reliance on Applicant's Data. The determination of this office that issuance of this permit is not contrary to the public interest was made in reliance on the information you provided.

5. Reevaluation of Permit Decision. The Corps may reevaluate its decision on this permit any time the circumstances warrant. Circumstances that could require a reevaluation include, but are not limited to:

- a. Failure to comply with the terms and conditions of this permit.
- b. The information provided by you in support of your permit application proves false, incomplete, or inaccurate (See 4 above).

c. Significant new information surfaces which the Corps did not consider in reaching the original public interest decision.

Such a reevaluation may result in a determination that it is appropriate to use the suspension, modification, and revocation procedures contained in 33 CFR 325.7 or enforcement procedures such as those contained in 33 CFR 326.4 and 326.5. The referenced enforcement procedures provide for the issuance of an administrative order requiring you to comply with the terms and conditions of your permit and for the initiation of legal action where appropriate. You will be required to pay for any corrective measures ordered by the Corps, and if you fail to comply with such directive, the Corps may in certain situations (such as those specified in 33 CFR 209.170) accomplish the corrective measures by contract or otherwise and bill you for the cost.

6. Extensions. General condition 1 establishes a time limit for the completion of the activity authorized by this permit. Unless there are circumstances requiring either a prompt completion of the authorized activity or a reevaluation of the public interest decision, the Corps will normally give favorable consideration to a request for an extension of this time limit.

Your signature below, as permittee, indicates that you accept and agree to comply with the terms and conditions of DA permit SAC-2015-01080.

When the structures or work authorized by this permit are still in existence at the time the property is transferred, the terms and conditions of this permit will continue to be binding on the new owner(s) of the property. To validate the transfer of this permit and the associated liabilities associated with compliance with its terms and conditions, have the transferee sign and date below.

(TRANSFEEE) (PRINT NAME)

(DATE)

**APPENDIX A
SPECIAL CONDITIONS FOR PERMIT SAC-2015-01080**

- a.** The permittee agrees to provide all contractors associated with construction of the authorized activity a copy of the permit and drawings. A copy of the permit must be available at the construction site at all times.
- b.** The permittee shall submit a signed compliance certification to the Corps within 60 days following completion of the authorized work and any required mitigation. The certification will include:
- 1.** A copy of this permit.
 - 2.** A statement that the authorized work was done in accordance with the Corps authorization, including any general or specific conditions.
 - 3.** A statement that any required mitigation was completed in accordance with the permit conditions.
 - 4.** The signature of the permittee certifying the completion of the work and mitigation.
- c.** The permittee shall implement the following environmental commitments to protect cultural resources present with the project boundary. The commitments include:
- 1.** During the construction phase of the project, the contractor and subcontractors must notify their workers to watch for the presence of any prehistoric or historic remains, including but not limited to arrowheads, pottery, ceramics, flakes, bones, graves, gravestones, or brick concentrations. If any such remains are encountered, the Resident Construction Engineer (RCE) and SCDOT's Construction Manager would be immediately notified and all work in the vicinity of the discovered materials and site work shall cease until the SCDOT Chief Archaeologist directs otherwise. SCDOT Chief Archaeologist, Tracy Martin, can be contacted at 803-737-6371.
 - 2.** An archaeological professional will be present during any ground disturbing activities related to Site 38LX212 and 38RD59. Additionally, sites 38RD140, 38RD1175, and 38RD1176 will be protected from indirect effects, including borrow sites and equipment staging. Sites will be clearly marked in the field using orange construction fencing prior to beginning construction activities in the vicinity of the resources.
 - 3.** The Saluda Canal (Site 38RD59) would be clearly plotted on all construction plans. SCDOT has reduced ROW widths in the vicinity of the canal to avoid impacts to the canal during construction & any future maintenance activities along the ROW. A 25-foot buffer will be maintained around the canal for the majority of the resource. This zone would be clearly marked in the field using orange fencing during construction, and all ground disturbance and construction staging activities would be conducted outside of this buffer in order to avoid all possible impacts to the resource. SCDOT proposes to revise the commitment of a 25-foot buffer for a

distance of approximately 700 feet along the proposed ramp to allow room for temporary construction access & equipment near 1-26 Ramp C. To protect the boundary of the canal at this location, the following will be added to the contract as commitments:

- a. Prior to construction activities orange protective fencing will be installed along the edge of boundary of the Saluda Canal Historic District in areas that will maintain the original buffer as well as those areas where the buffer has been requested to be reduced between the two drainages and for a length to the south of the southernmost drainage.
 - b. Prior to construction activities silt fencing will be installed along the edge of SCOOT right of way to prevent runoff.
 - c. For areas along the identified Saluda Canal located along the 1-26 Ramp C beginning Station 5412+50 and ending Station 5419+50 clearing will be allowable to the right of way but grubbing will be limited to within a distance of 5-feet inside of the right of way. Grubbing activities within the 5-foot buffer will require approval from SCOOT prior to occurring.
 - d. During land clearing activities prior to construction, an archaeologist will be present at all times to ensure that these activities undertaken close to the fencing do not damage the canal.
 - e. During construction, an archaeologist will visit the construction site twice a week to ensure that no activities have crossed over the protective fencing. Any observations during these visits will be recorded in an inspection log that will be made available to the SHPO.
 - f. As soon as an inadvertent impact is discovered, such as a previously unidentified cultural resource, archaeological feature, or artifact, construction in that area will stop immediately until an onsite consultation with SCOOT archaeologists and SHPO can determine the best strategies for avoiding, minimizing, or mitigating adverse effects upon the resource.
- d.** That the permittee shall utilize clean fill materials for the construction of the Carolina Crossroads Corridor Improvement project that are free of potential sources of pollution to protect the water quality of the tributaries to Saluda River and Broad River.”
- e.** That the permittee will provide compensatory stream and wetland mitigation by implementing the permittee-responsible mitigation (PRM) plan entitled, “Mitigation Plan Carolina Crossroads I-20/26/126 Corridor Improvements Lexington and Richland counties, South Carolina” dated June 30, 2020. This PRM plan includes 2,525 linear feet of in stream enhancement, creation of 15, 354 linear feet of new restored stream channel and other impacts within waters. These restoration, enhancement and preservation activities contained in this PRM plan are authorized with this DA permit. The construction activities within waters associated with this approved PRM will need to commence prior to or concurrent with the beginning of the construction of the Carolina Crossroads Corridor Improvement Project. In addition, this PRM plan

includes steps to protect the site, to provide maintenance and management of the site, to provide financial assurances and monitoring activities to document site construction and success. Furthermore, that as part of the “Mitigation Plan Carolina Crossroads I-20/26/126 Corridor Improvements Lexington and Richland counties, South Carolina” dated June 30, 2020, the permittee will provide five years of monitoring including discussion of performance standards as detailed in this PRM plan. This five-year monitoring will begin during the first growing season after all activities (earthmoving, construction, stabilization and planting) within waters of the U.S. approved by this permit have been completed at the PRM sites.

- f.** That as part of the “Mitigation Plan Carolina Crossroads I-20/26/126 Corridor Improvements Lexington and Richland counties, South Carolina” dated June 30, 2020, SCDOT will provide the Corps with documentation of the transfer of ownership of this property to South Carolina Department of Natural Resources and will provide updates on the progression and documentation until the Belfast site and PH Timber site are incorporated into SCDNR’s Belfast Wildlife Management Area.
- g.** That the permittee is not authorized to commence impacts to Tributary 39, including 2,295 linear feet of stream relocation (per drawing Sheets 64-67 of 78), until after the Corps has provided written notice to proceed. The permittee further agrees that as compensatory mitigation for 2,295 linear feet of stream relocation and fill activities associated with Tributary 39, the permittee will submit a draft mitigation plan to address and adequately mitigate for these impacts. No work in waters of the U.S. associated with Tributary 39 is authorized until the permittee receives, in writing, Corps approval of the final Tributary 39 stream mitigation plan (e.g., a stream restoration plan, or the purchase of adequate stream mitigation credits for the 2,295 linear feet of impacts). The permittee shall fully implement this final Tributary 39 mitigation plan concurrently with, or prior to, Tributary 39 impacts to waters of the U.S, including the 2,295 linear feet of stream relocation.
- h.** That as compensatory mitigation for impacts to aquatic resources, the permittee agrees to debit 11.32 acres of wetland from SCDOT’s Black River Mitigation Bank. The applicant will provide at least 50% of the required stream and wetland mitigation credits as restoration mitigation credits.
- i.** That the permittee must submit evidence of the purchase or debit of the required mitigation credits to both the Corps of Engineers and SCDHEC prior to commencement of the authorized work. Your responsibility to complete the required compensatory mitigation will not be considered fulfilled until you have received written verification from the U.S. Army Corps of Engineers.
- j.** That the permittee will provide the following Hydrologic and Hydraulic evaluation information to the Corps for review and approval prior to beginning construction of each phase of the Carolina Crossroads Corridor Improvement Project. These items will include the following:

 - 1. The permittee (or designated assignee) agrees that the drainage/conveyance systems shall be designed by a licensed Professional Engineer (PE) to meet all requirements set forth by the South Carolina Department of Transportation (SCDOT), AASHTO, FHWA, and FEMA. The design criteria for storm drainage, culverts, and bridges will be based on SCDOT's "Requirements for Hydraulic

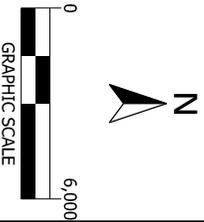

Design Studies" dated May 26, 2009. In addition to the hydraulic analysis required by the SCDOT Requirements for Hydraulic Design Studies, hydraulic analysis the following hydraulic data for all structures (including bridges, culverts, cross-drainage structures and drainage systems) which are located in and/or are associated with jurisdictional Waters of the U.S. will be performed. This analysis will include:

- Pre- and post-flow rate analyses at each outfall location for the 10-year, 25-year, 50-year, and 100-year storms in accordance with SCDOT requirements.
 - Pre- and post-construction hydraulic analyses of cross-lines and pipe inlets for the 10-year, 25-year, 50-year, and 100-year storms with HY-8, HEC-RAS, or other approved modeling software. The pre-construction analysis shall include an evaluation of the pre-construction flows for the pre-project hydraulic conditions. The post-construction analysis shall include an evaluation of the post-construction flows for the post-project hydraulic conditions. The analysis shall be performed to include a comparison of the pre-construction and post-construction water surface elevations and velocities upstream and downstream of cross-drainage structures and pipe inlets.
 - Pre- and post-open channel analyses of outfall channels for the 10-year, 25-year, 50-year, and 100 –year storms.
 - Pre- and post-flow rate analyses at each bridge location for the 10-year, 25-year, 50-year, and 100-year storms in accordance with SCDOT requirements.
2. For all project areas located within FEMA Special Flood Hazard Areas or within Flood Insurance Rate Map (FIRM) mapped areas, the hydraulic analysis and modeling shall be performed in accordance with the following:
- HEC-RAS hydraulic modeling shall be used to evaluate drainage structures within FEMA Special Flood Hazard Areas. If the FEMA effective model utilizes an alternative software, the software used for the FEMA effective model may be utilized to evaluate the drainage structure.
 - Perform required analysis to satisfy requirements of the National Flood Insurance Program including coordination of the results of the hydraulic studies with the local Floodplain Manager. The summary report shall be provided to the local Floodplain Manager and a letter of concurrence shall be requested from the local Floodplain Manager confirming the design satisfies the typical FEMA design criteria.
 - Prepare documentation for coordination with FEMA as required (including receipt of No-Impact Certification or CLOMR/LOMR from FEMA).
3. For any future Department of Army permit modification, the following hydraulic design data shall be provided to the Corps for review/approval 120 days prior to the anticipated commencement of authorized work. Please note

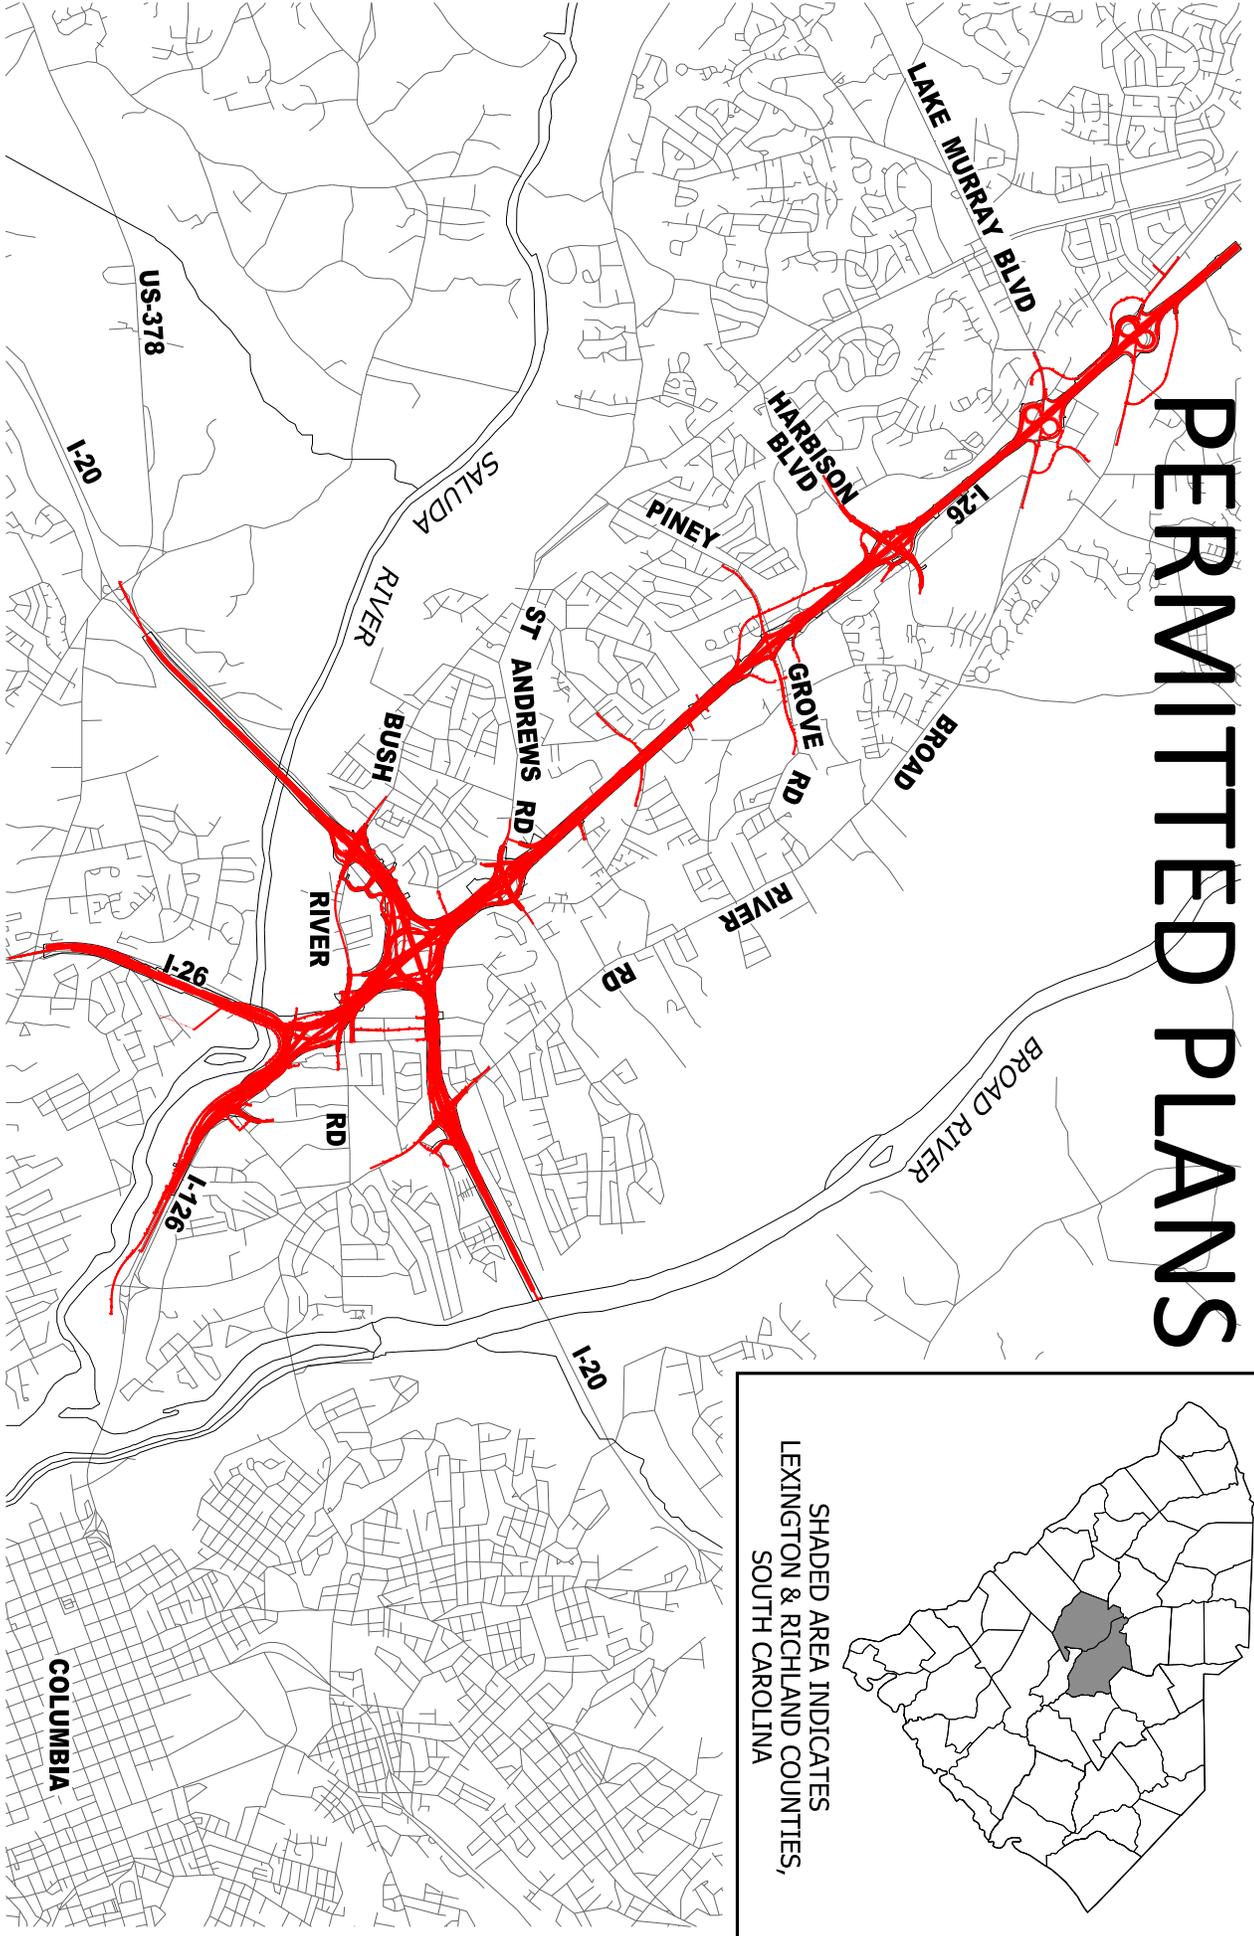

that written authorization/ concurrence must be received from the Corps prior to commencement of work. This information should include:

- **Project plans including structure/feature location with dimensions of existing and proposed structure/feature. These plans should include cross-sectional views detailing authorized structure or modified feature with proposed and existing water surface elevations during all analyzed storm events.**
 - **Details related to any channel relocations that includes existing dimensions along proposed dimensions. These details should include cross sectional views detailing the work and proposed/existing water surface elevations during all analyzed storm events. This relocation plan will also include construction sequencing and Best Management Practices (BMPs) to minimize impact upon the aquatic environment and demonstrate adequate stabilization of the new channel.**
 - **Hydraulic Design Summary Table to include the following:**
 - **Structure, or channel location**
 - **Waterbody Classification (Perennial Stream, Intermittent Stream, Non-Jurisdictional Feature, etc.)**
 - **Existing Drainage Structure dimensions**
 - **Proposed Drainage Structure dimensions**
 - **Invert elevations**
 - **Drainage Area**
 - **Pre- and Post-Construction Design Flows, Headwater Elevations, and Tail water Elevations for the 10-Year, 25-Year, 50-Year, 100-year storm events**
 - **Summary table for outfall (culverts / pipes) riprap protection to include discharge velocities for the 10-year, 25-year, 50-year, and 100-year design storms and dimensions of riprap pads.**
 - **Outlet Protection details**
 - **Top of roadway elevations**
- 4. For areas where this project will cause an increase upon Water Surface Elevation (WSE) that result in water outside of the permittee' s project Right-of-Way from the analyzed storm events, the permittee shall provide details of notification/coordination with each property owner.**
- 5. For each property affected by an increase in post-development WSE, the permittee shall notify the affected property owner(s) and will provide the following details to them: property location, details of the impact to the property, area of extent ponded water (map), and water surface elevation information including the increase over existing conditions and duration of impact to each affected property.**
- k. The permittee must implement appropriate best management practices that will minimize erosion and migration of sediments on and off the project site during and after**

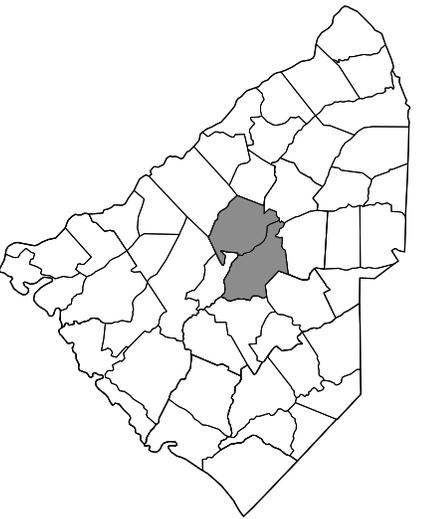

construction. These practices should include the use of appropriate grading and sloping techniques, mulches, silt fences, or other devices capable of preventing erosion, migration of sediments, and bank failure. All disturbed land surfaces and sloped areas affected by the project must be stabilized upon project completion. This will include all requirements of the Water Quality Certification as approved by SCDHEC on August 31, 2020.

Carolina Crossroads Mitigation Site - PH Timber Tract
Newberry County, South Carolina

Title Sheet

Date:	05.20.2020
Job Number:	005-05200
Project Engineer:	GLS
Drawn By:	MJC
Checked By:	DHJ

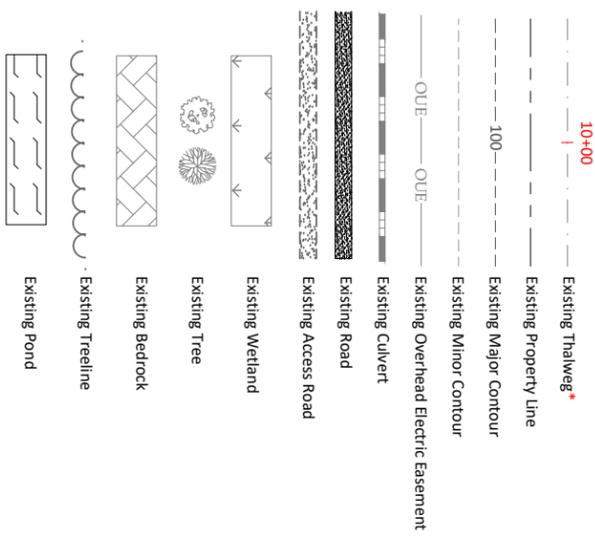

1.1

- GENERAL NOTES:**
1. SEDIMENT AND EROSION CONTROL PRACTICES SHALL COMPLY WITH THE SOUTH CAROLINA DHEC BMP HANDBOOK, CURRENT EDITION.
 2. THE CONTRACTOR WILL INSTALL PUMP-AROUND SYSTEMS AS A SEDIMENT AND EROSION CONTROL PRACTICE UNTIL THE DISTURBED WORK AREA IS STABILIZED IN ACCORDANCE WITH THE PLANS. IF FLOW IS NOT SUFFICIENT AT THE TIME OF CONSTRUCTION TO CAUSE SEDIMENTATION TO DOWNSCREEN WATERS, PUMP-AROUND OPERATIONS MAY NOT BE REQUIRED, AS DETERMINED BY THE ENGINEER. IN THESE CASES, ROCK CHECK DAMS WILL BE IMPLEMENTED IN ACCORDANCE WITH SPAING AND PLACEMENT REQUIREMENTS OUTLINED IN THE SOUTH CAROLINA DHEC BMP HANDBOOK.
 3. TREES DEPicted WITHIN THE LIMITS OF DISTURBANCE AND NOT PROTECTED WITH SAFETY FENCING MAY BE HARVESTED AND USED FOR IN-STREAM STRUCTURES (E.G., BRUSH TOE OR LOG SILL) AT THE DIRECTION OF THE ENGINEER.
 4. ON-SITE ROCK WILL BE SALVAGED AND STOCKPILED FOR REUSE. ROCK SHALL BE REUSED IN ACCORDANCE WITH THE APPLICABLE MATERIAL SPECIFICATIONS HEREIN AND AS DIRECTED BY THE ENGINEER.
 5. UPON COMPLETION OF STABILIZATION ACTIVITIES WITHIN ACTIVE WORK AREAS, TEMPORARY HAUL ROADS WILL BE REMOVED AND GRADED TO FINISH GRADE AS SHOWN ON THE PLANS AS DIRECTED BY THE ENGINEER. FINISH GRADE HAUL ROAD AREAS WILL BE DISKED OR RIPPEd TO A MINIMUM DEPTH OF 18 INCHES, RAKED AND SEEDED TO FACILITATE STABILIZATION. NO ADDITIONAL USE OF RIPPEd/DISKED AND SEEDED HAUL ROADS WILL BE PERMITTED.

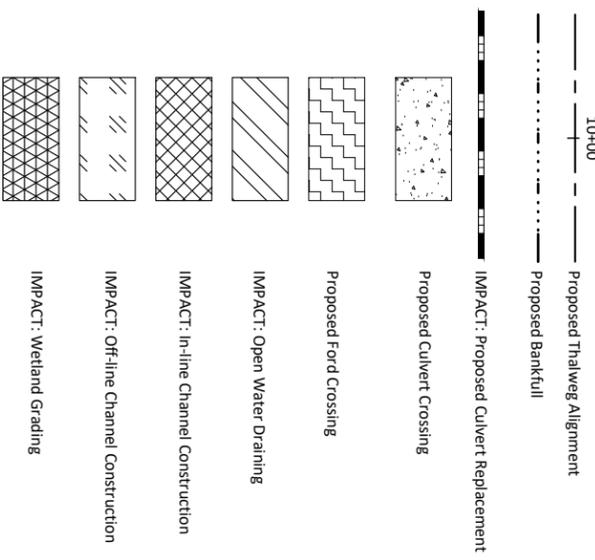

- CONSTRUCTION SEQUENCE:**
- THE CONSTRUCTION SEQUENCE OUTLINED BELOW REPRESENTS GENERAL CONSTRUCTION ACTIVITIES. SEDIMENT AND EROSION CONTROL MEASURES AND DETAILED MEASURES TO FACILITATE THE CONSTRUCTION OF THE SITE. PRIOR TO LAND DISTURBING ACTIVITIES, THE CONTRACTOR SHALL PROVIDE THE ENGINEER WITH A DETAILED SEQUENCE OF CONSTRUCTION. THIS SEQUENCE WILL INCLUDE THE PROPOSED CONSTRUCTION SEQUENCE FOR EACH RESTORATION AREA, GENERAL TIMELINE FOR COMPLETION AND STABILIZATION OF EACH REACH AND ANY PROPOSED HAUL ROADS OR STOCKPILE AREAS THAT MAY DEVIATE FROM THE PLANS HEREIN. THE ENGINEER WILL REVIEW THIS CONSTRUCTION SCHEDULE FOR COMPLIANCE WITH THE STORMWATER POLLUTION PREVENTION PLAN (SWPPP) FOR THE SITE AND APPLICABLE PERMIT REQUIREMENTS. THE CONTRACTOR WILL NOT COMMENCE LAND DISTURBING ACTIVITIES OR CONSTRUCTION PRIOR TO APPROVAL OF THE CONSTRUCTION SEQUENCE BY THE ENGINEER.
1. CONTRACTOR SHALL COMMENCE CONSTRUCTION SEQUENCE SHALL AT A MINIMUM, INCLUDE THE FOLLOWING:
 1. CONTRACTOR SHALL CONTACT SOUTH CAROLINA 811 PRIOR TO SITE MOBILIZATION.
 2. INSTALL PERIMETER SEDIMENT AND EROSION CONTROL MEASURES AS SHOWN ON THE PLANS INCLUDING CONSTRUCTION ENTRANCES, STAGING AND STOCKPILE AREAS, TEMPORARY ACCESS ROADS, SILT FENCE, TREE PROTECTION FENCING, CHECK DAMS, AND TEMPORARY STREAM CROSSINGS.
 3. SET UP TEMPORARY FACILITIES AND MOBILIZE EQUIPMENT AND MATERIALS TO THE SITE. PLACE IMPORTED MATERIALS WITHIN THE LIMITS OF THE PROTECTED STOCKPILE AREAS.
 4. MATERIAL HARVESTED FROM EXISTING CHANNEL SHALL BE MAINTAINED FOR REUSE ON-SITE.
 5. INSTALL AND MAINTAIN ON-SITE RAIN GAUGE AND LOG BOOKS FOR NPDES AND SWPPP PERMIT REQUIREMENTS IN ACCORDANCE WITH THE ON-SITE SWPPP. THE ON-SITE SWPPP MUST BE EXECUTED AND MAINTAINED ON-SITE FOR THE DURATION OF PROJECT ACTIVITIES.
 6. SEDIMENT AND EROSION CONTROL MEASURES SHALL BE INSPECTED AT THE END OF EACH WORK DAY TO ENSURE THEY ARE FUNCTIONING IN ACCORDANCE WITH THE SWPPP AND PLANS HEREIN. ANY DEFICIENCIES SHALL BE REPAIRED IMMEDIATELY.
 7. IN-STREAM WORK SHALL COMMENCE FROM UPSTREAM TO DOWNSCREEN UNLESS OTHERWISE DIRECTED BY THE ENGINEER TO PRECLUDE THE TRANSPORT OF SEDIMENT TO RESTORED SECTIONS OF THE STREAM.
 8. WHEN WORKING IN A LIVE WATERCOURSE A PUMP-AROUND SYSTEM IS REQUIRED. INSTALL IMPERVIOUS DIKES UPSTREAM AND DOWNSCREEN OF THE PUMP-AROUND LOCATIONS. THE PUMP-AROUND OPERATION SHALL BE PERFORMED BETWEEN THESE DIKE LOCATIONS. THE PUMP-AROUND SYSTEM SHALL BE IN PLACE PRIOR TO CLEARING AND GRUBBING ACTIVITIES WITHIN THE WORK ZONE.
 9. PERFORM ANY NECESSARY CLEARING AND GRUBBING IN PHASES AS WORK PROGRESSES. BANK VEGETATION AND VEGETATION IMMEDIATELY ADJACENT TO LIVE CHANNELS SHALL BE LEFT UNDISTURBED AS LONG AS POSSIBLE.
 10. THE TOP 6 INCHES OF TOPSOIL WITHIN THE LIMITS OF CLEARING SHALL BE STRIPPED AND STOCKPILED ON-SITE FOR REUSE UPON ACHIEVEMENT OF FINISH GRADE. WHERE BEDROCK OR UNSUITABLE SOIL CONDITIONS EXIST TO PREVENT TOPSOIL STRIPPING, THE ENGINEER SHALL DIRECT THE CONTRACTOR TO THE LIMITS OF TOPSOIL TO BE

11. PERFORM EXCAVATION AND GRADING AS WORK PROGRESSES. MASS STRIPPING OF TOPSOIL IS NOT PERMITTED.
12. STOCKPILE EXCAVATED SOIL AS NECESSARY. THE CONTRACTOR WILL ENSURE THAT EROSION AND SEDIMENT CONTROL PRACTICES ARE PROPERLY INSTALLED AND FUNCTIONING IN STOCKPILE AREAS AS SHOWN ON THE EROSION AND SEDIMENT CONTROL PLAN (SWPPP).
13. CONSTRUCT IN-STREAM STRUCTURES AND INSTALL RIFFLE AND POOL FEATURES ACCORDING TO PLANS, DETAILS, AND SPECIFICATIONS AS CONSTRUCTION PROGRESSES.
14. PRIOR TO PERFORMING RESTORATION ACTIVITIES ON UT7, THE POND AT THE UPPER LIMITS OF THE WORK AREA SHALL BE MANUALLY BREACHED AND DRAINED THROUGH SILT BAGS PRIOR TO STREAM CONSTRUCTION. DISCHARGE THROUGH THE BREACH MUST BE CONTROLLED TO PREVENT DOWNSCREEN SEDIMENT DISCHARGE.
15. SEED AND MAT BANKS AND FLOODPLAIN AREAS ACCORDING TO THE PLANS AND DETAILS.
16. ONCE DISTURBED AREAS AND EXPOSED SLOPES ARE STABILIZED, REMOVE PUMP-AROUND SYSTEM, IF USED, AND MOVE TO THE NEXT PHASE OF CONSTRUCTION.
17. BACKFILL ABANDONED CHANNEL SECTIONS WITH STOCKPILED SOIL. ALL NON-NATIVE, INVASIVE SPECIES SHALL BE TREATED AND/OR REMOVED FROM THE OLD CHANNEL PRIOR TO BACKFILLING.
18. SEED AND MULCH OR SOD ANY BACKFILL SECTIONS BEFORE PROCEEDING TO NEXT PHASE.
19. ONCE ALL PHASES OF CHANNEL AND FLOODPLAIN GRADING ARE COMPLETE, PREPARE THE FLOODPLAIN FOR PLANTING PER THE SPECIFICATIONS.
20. APPLY PERMANENT SEED AND PLANT VEGETATION IN THE FLOODPLAIN.
21. SEED AND STABILIZE STAGING AREAS AND STOCKPILE AREAS.
22. ONCE PERMANENT SEED IS ESTABLISHED, MINIMUM 70% COVERAGE AND APPROVAL FROM THE ENGINEER, REMOVE TEMPORARY STREAM CROSSINGS, STOCKPILE AREAS, AND SEDIMENT AND EROSION CONTROL PRACTICES. NO SEDIMENT AND EROSION CONTROL MEASURES SHALL BE REMOVED WITHIN PRIOR APPROVAL FROM ENGINEER.
23. CONTRACTOR SHALL REMOVE ALL TRASH, DEBRIS, AND ANY LEFTOVER CONSTRUCTION MATERIALS PRIOR TO DEMOBILIZATION.
24. DEMOBILIZE EQUIPMENT FROM THE SITE.
25. DEMOBILIZE ALL EQUIPMENT, OFFICES, BUILDINGS, AND OTHER FACILITIES ASSEMBLED ON THE SITE.

Existing Features

Proposed Features

*THE EXISTING THALWEG STATIONING WAS UTILIZED FOR STREAM IMPACT QUANTIFICATIONS

*THE EXISTING THALWEG STATIONING WAS UTILIZED FOR STREAM IMPACT QUANTIFICATIONS

- NOTES:
- ENHANCEMENT REACHES INCLUDE A COMBINATION OF LOCALIZED CHANNEL RECONSTRUCTION AND BANK TREATMENTS. CHANNEL RECONSTRUCTION OCCURS WITHIN THE EXISTING CHANNEL USING A SERIES OF IN-STREAM STRUCTURES (I.E. CONSTRUCTED RIFFLES) TO ELEVATE THE STREAM BED AND IMPROVE CHANNEL DIMENSION AND PROFILE. THESE STRUCTURES ALSO PROMOTE STABILITY AND IMPROVE HABITAT. BANK TREATMENTS SUCH AS LIVE STAKES, POINT BAR SHAIVING (FLATTENING A POINT BAR) AND BRUSH TOE ARE IMPLEMENTED TO REINFORCE BANKS AND CHANNEL STABILITY AND PROVIDE HABITAT DIVERSITY.
