Mobile Inspector Application:

- Go to https://mobileinspector.app/

Background:

Progressive Web Application

- Mobile Inspector is a progressive web application that is accessed like a website instead of downloading from an app store. However, once the user navigates to Mobile Inspector, they should immediately dock the application to their device. This will give the user a Mobile Inspector icon directly on the device screen to use like a regular, native application.

Data Integrity

- It is extremely important for the user to dock their Mobile Inspector instance to the home screen of their device. This will provide easy access to the application for the user and ensure data integrity remains intact.
- In addition, once a Device ID has been generated and Contracts have been received, users should not clear their device's browser history or uninstall Mobile Inspector without first consulting with either SCDOT or Infotech Customer Support. Doing so could result in the need to generate a new Device ID and the loss of in progress reports.
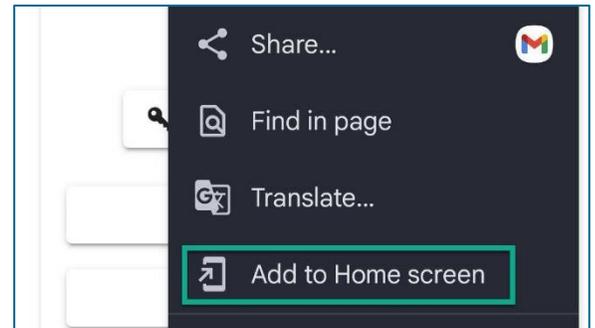

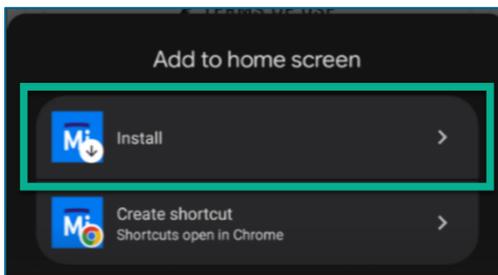

Docking Mobile Inspector using an Android Device:

1. From your Google Chrome browser window, select the three vertical dots in the upper right corner of the screen.

2. Select the **Add to Home screen** option.

3. From the pop–up window, select the **Install** button.

   - **Note:** If the page doesn't close automatically, it is safe to close it.

4. Navigate to your home screen, where the Mobile Inspector icon should be visible.

Docking Mobile Inspector using an Apple Device:

1. From your Safari browser window, click the **Share** button.

2. Select the **Add to Home screen** option.

   - **Note:** If you do not immediately see the **Add to Home Screen** option, try scrolling vertically (on newer iOS devices) or horizontally (on older iOS devices) to locate this option.
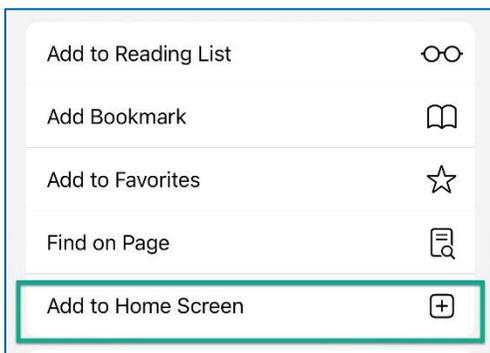

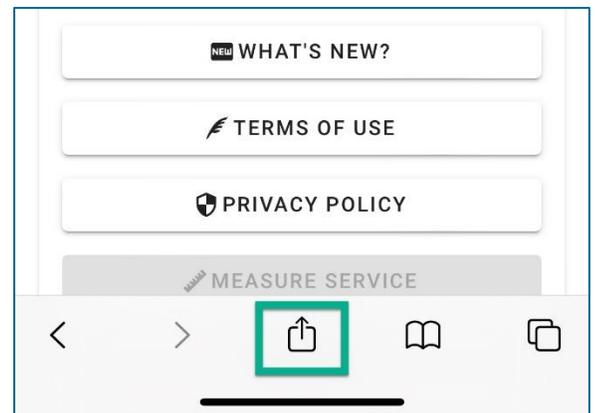

3. You will receive a prompt asking you to confirm the app name; here, you can edit the app name if you wish.

4. Click **Add**.

   - **Note:** The browser window will close automatically.

5. Navigate to your home screen, where the Mobile Inspector icon should be visible.

Generating a Device ID:

1. Launch Mobile Inspector from your device's home screen.

2. Select the **Terms of Use** button.

3. Review the Terms of Use.

4. After reviewing the Terms of Use, select the **Accept** or **Decline** button.

   - **Note:** You will be prevented from generating a Device ID if you decline the Terms of Use. If you accept the terms, you will be returned to the About screen.

🛡 PRIVACY POLICY

5. From the About screen, select the **Register This Device** button.

6. Next to the generated **Device ID**, click the **Copy** button so you can paste the **Device ID** as needed.

7. Provide your Device ID to your AASHTOWare Project™ System Administrator here.
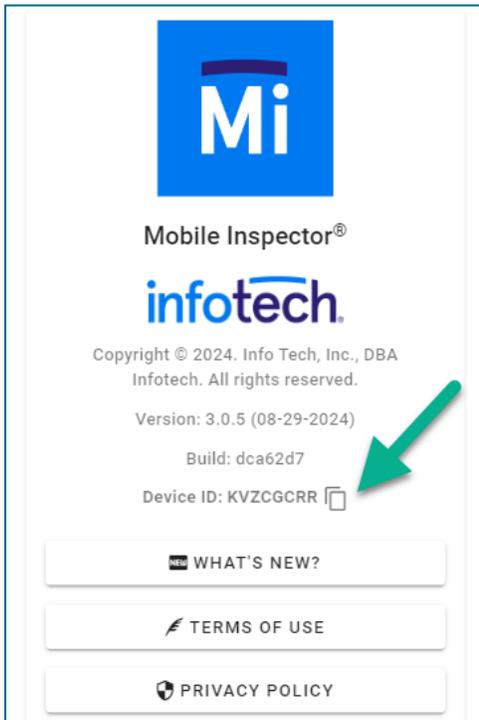

Frequently Asked Questions:

- **Can the same Device ID work across multiple devices?**

  No, each device will generate its own unique Device ID.

- **Can I use Mobile Inspector on multiple devices?**

  Yes, but your System Administrator will need to associate two separate Device IDs to your User in AASHTOWare Project™. However, you will not be able to see Unsynced reports in one device appear on the other device. Only successfully Synced reports will also appear for the same contract on the additional device. It is encouraged that you fully complete your report on the device the report is created on.
