

Shared Use Path Criteria

Swamp Rabbit Trail Green Loop (S-23-80 Site)

For the portion of the trail to be relocated, follow the criteria below:

- Install one 2" diameter PVC conduit under the pathway at each intersection of the trail
- Install ADA compliant ramps. ADA ramps shall include detectible warning and match width of pathway
- Crosswalks shall match width of pathway(s) and shall be ladder style
- Safety fencing required when adjacent slope is greater than 3/1 and closer than 5' to the edge of pavement. See attached detail for fencing
- Trail striping is To Be Determined and will be designed and completed by others.
- No bollards are required
- The City of Greenville will be designing lighting in this section, so future addition of lighting bases should be considered
- The City of Greenville will be designing furnishings and landscaping into this section as well, so this should be considered during your design.
- The City of Greenville is planning to install a root barrier system as well, so this should be considered in your project along the trail.

Meadowbrook Green Loop (S-23-80 Site)

- Relocate Meadowbrook Green Loop outside of SCDOT right-of-way within the project limits and provide a 4 foot buffer to the R/W line
- Match existing trail base and concrete thickness
- Trail width shall be 16'

Swamp Rabbit Trail Orange Line (S-23-147 Site)

- Preserve Swamp Rabbit Trail Orange Line to the extent practical
- Tie SWT Orange Line to reconstructed S-147 using pavement design for mainline S-147

48" TALL - 4 RAIL FENCE DETAIL
