To be processed as a Programmatic Categorical Exclusion (PCE) the following conditions must be met in addition to the General Criteria (as outlined in the PCE Agreement between FHWA-SC and SCDOT). Place a "X" in the appropriate box below. If the answer is "Yes" to any of the below criteria, SCDOT will consult with FHWA-SC to determine the appropriate level of NEPA documentation required and forward to FHWA-SC for approval. *Reference Part 4 of the Processing form or Section IV of the PCE Agreement for more details and definitions regarding each threshold.						
1. Invol	ves any unusual circ	umstances a	s described in * <u>23 CFR Part 771.117(b)</u>		☐ Yes	⊠ No
	cquisition of more t ht-of-way	:han * <u>minor</u> a	amounts of temporary or permanent s	trips	☐ Yes	⊠ No
3. Invol	ves acquisitions tha	t result in res	idential or non-residential displaceme	nts	☐ Yes	⊠ No
4. Invol	ves any adverse imp	acts to EJ po	pulations		☐ Yes	⊠ No

PCE Processing Form Continued:

	Part 3 - Thresholds Continued				
5.	Results in capacity expansion of a roadway by adding through lanes	☐ Yes	×	No	
6.	Involves construction that would result in *major traffic disruptions	☐ Yes	1	No	
7.	Involves *changes in access control requiring FHWA approval	☐ Yes	×	No	
8.	An adverse effect determination under Section 106 of the National Historic Preservation Act.	☐ Yes	×	No	
9.	Use of Section 4(f) property that cannot be documented with a FHWA <i>de minimis</i> determination or a programmatic Section 4(f) other than the programmatic evaluation for the use of historic bridges	☐ Yes	X	No	
10.	Any use of a Section 6(f) property	☐ Yes	\boxtimes	No	
11.	Requires an Individual USACE 404 Permit	Yes	×	No	
12.	Requires an Individual U.S. Coast Guard Permit.	☐ Yes	\times	No	
13.	Work encroaching in a regulatory floodway, adversely affecting the base floodplain (100 yr.) pursuant to E.O. 11988 and 23 CFR Part 650 Subpart A	☐ Yes	X	No	
14.	Construction in, across, or adjacent to a river designated as a National Wild and Scenic River	☐ Yes	×	No	
15.	Involves an increase of 15 dBA or greater on any noise receptor or abatement measures are found to be feasible and reasonable due to noise impacts	☐ Yes	X	No	
16.	May affect and is likely to adversely affect a Federally listed species or designated critical habitat or projects with impacts subject to the BGEPA	☐ Yes	\boxtimes	No	
17.	Involves acquisition of land for hardship, protective purposes, or early acquisition	Yes	×	No	
18.	Does not meet the latest Conformity Determination for air quality non-attainment areas (if applicable).	☐ Yes	×	No	
19.	Any known or potential <u>major</u> hazardous waste sites within the right-of-way.	☐ Yes	\times	No

2. Is th	2. Is there a formal plan to use this parcel for a future transportation project (is it part of an approved LRTP)?				
Form Updated: 5-02-2022 Page 2 of 3					

Part 4 - Threshold Definitions

Unusual Circumstances (23 CFR Part 771.117) - Unusual circumstances are defined as:

- a. Significant environmental impacts;
- b. Substantial controversy on environmental grounds;
- c. Significant impact on properties protected by Section 4(f) of the DOT ACT or Section 106 of the National Historic Preservation Act; or d. Inconsistencies with any Federal, State, or local law, requirement, or administrative determination relating to the environmental aspects of the action.

Minor Amount of Right-of-Way (ROW):

A minor amount of ROW is defined as less than 3 acres per linear mile for linear projects or less than 10 acres of impacts for non-linear projects (eq: intersections, bridges), and no removal of major property improvements. Examples of major improvements include residential and business structures, or the removal of other features which would change the functional utility of the property. Removal of minor improvements, such as fencing, landscaping, sprinkler systems, and mailboxes would be allowed.

Major Traffic Disruptions:

A major traffic disruption is defined as an action that would result in: a) adverse effects to through-traffic businesses or schools, b) substantial change in environmental impacts, or c) public controversy associated with the use of the temporary road, detour, or ramp closure.

Changes in Access Control:

Requires approval from EHWA for changes in access control on the Interstate system (e.g. Interchange Modification Reports or Interchange

Justification Reports).				
Environmental Commitments: (Check all that apply)			
USTs/Hazardous Materials	General Permit	Right of Way		
	☐ Individual Permit	⊠ Floodplains

Coast Guard Permit Exclusion	Noise	☐ Non-Standard Commitment (see below)		
Relevant field studies and environmental reviews have been completed to determine that the project meets the criteria set forth in the Programmatic Categorical Exclusion Agreement signed by FHWA-SC and SCDOT. It is understood that any additions/deletions to the project may void environmentally processing the project as presently classified; consequently, any engineering changes must be bought to the attention of SCDOT Environmental Services Office immediately. A copy of this form is included in the project file and one (1) copy has been provided to FHWA.

Cultural Resources Project Screening Form

Comments

widening)

This project will replace the pipe culvert carrying S-1210 (Buffalo Pond Road) over Tampa Creek, which was damaged during a flooding event. The culvert will be replaced on existing alignment and a small amount of new right-of-way (ROW) may be required. The survey area extends 75 feet to each side of the roadway centerline and 800 feet from either end of the culvert. The archaeological survey examined the survey area. The architectural survey examined the APE, which consisted of a 300-foot buffer around the survey area. The APE was reviewed using ArchSite, Google Earth, Web Soil Survey, historic topographic maps, and aerial photographs. The review determined that the area has not been previously surveyed for cultural resources. One unevaluated archaeological site, 38OR0358 is recorded in the survey area. The site was recorded from a collector's surface collection and its boundaries are undefined. Web Soil Survey maps the majority of the soils within the APE (81 percent) as well drained. The remaining soils are very poorly drained (19 percent). A cultural resources field survey, consisting of a pedestrian reconnaissance of the entire APE, augmented by the excavation of shovel tests, was conducted on January 30, 2025 with assistance from HDR. At the time of survey, the crossing was significantly damaged and the road was closed to traffic. Thirty-four initial shovel test locations were investigated. Twenty-three of these shovel tests were excavated; the 11 remaining shovel tests were not excavated due to wetlands and push piles. Two shovel tests were positive for cultural material. One archaeological site (38OR460) and no historic architectural resources were identified. Site 38OR460 is a late 19th to late 20th century farmstead site that includes a main house, sheds, a barn, animal pens, and chicken coops, all in various states of decay and collapse. The site lacks significance and is recommended not eligible for inclusion in the NRHP. No evidence of previously recorded site 38OR0358 was encountered and it will not be impacted by the project. No additional cultural resources investigations are recommended.

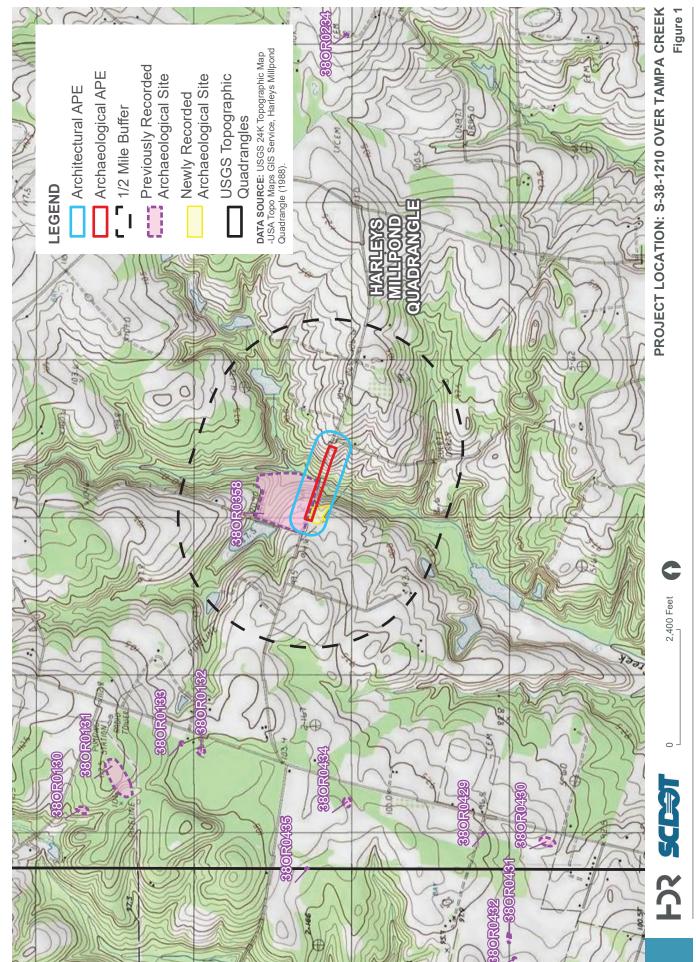

Effect Determination:	No Historic Properties Affected

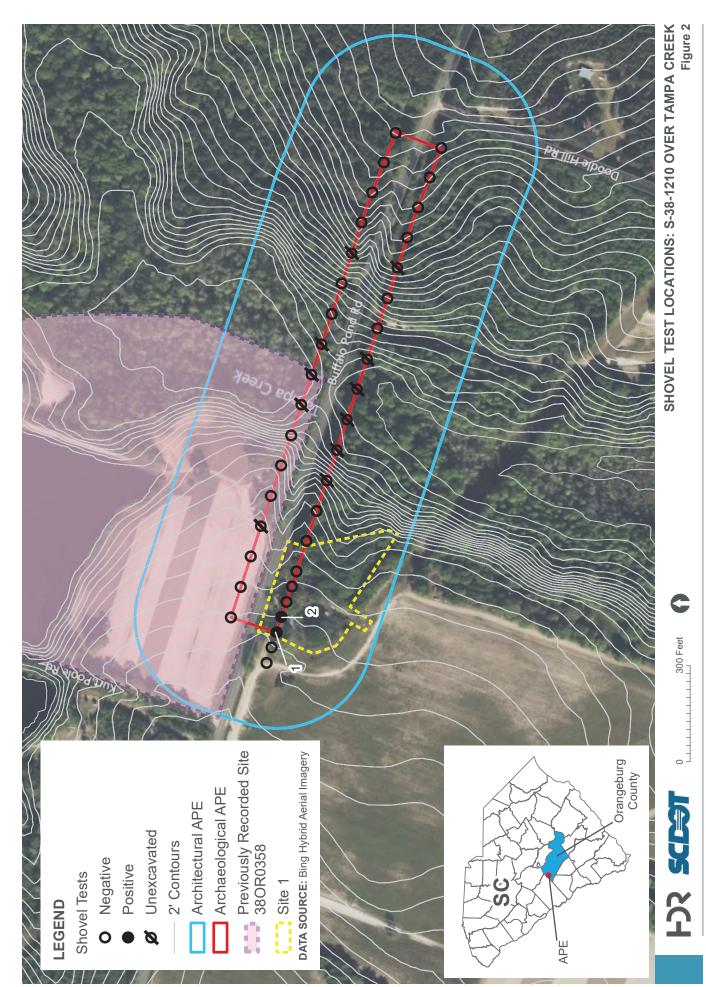

Type 3: Projects that do not fall into Type 1 and Type 2 categories (e.g. road

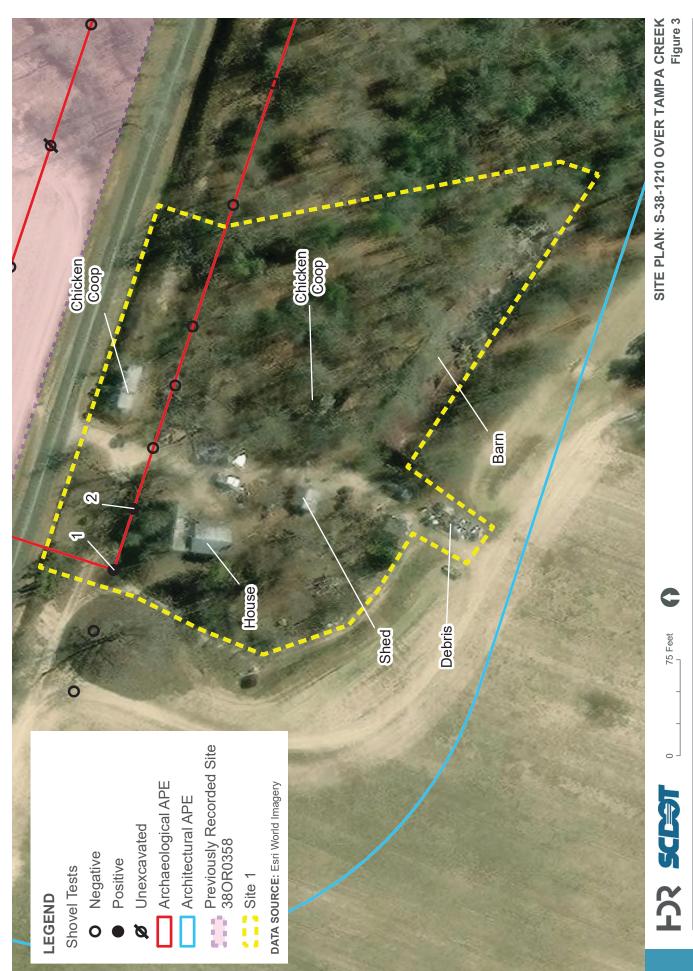

*SHPO consultation is required for all Type 3 projects and any project with a No Adverse or Adverse Effect Determination.

This screening form was developed to satisfy documentation requirements for Type I and Type II projects under a Programmatic Agreement between the Federal Highway Administration, the South Carolina State Historic Preservation Office, the US Army Corps of Engineers, and the South Carolina Department of Transportation. For Type I and Type II projects that have no effect on historic properties, the completion of this screening form with supporting documentation (e.g. ArchSite Map) provides evidence of FHWA and SCDOT's compliance with Section 106 of the National Historic Preservation Act.

Biological Assessment Report

Project Title: SC-1210 Over Tampa Creek (Emergency Replacement)

County: Orangeburg

SCDOT PIN: P044271

Date: 1/13/2025

Prepared By: Keith Walker

Pursuant to Section 7 of the Endangered Species Act, a field survey was conducted within the project corridor. The following list of threatened (T) and endangered (E) species was obtained from the U.S. Fish and Wildlife Service:

Description

Emergency replacement of the existing washed out culvert on SC-1210 with a bridge over Tampa Creek, Orangeburg County. The project site is in a rural area and consists primarily of hardwood bottoms and emergent wetlands associated with Tampa creek.

Species List

Species	Common Name	Status
Haliaeetus leucocephalus	Bald Eagle	BGEPA
Danaus plexippus	Monarch Butterfly	Proposed Threatened
Dryobates borealis	Red-cockaded Woodpecker	Threatened
Oxypolis canbyi	Canby's Dropwort	Endangered

Birds

Haliaeetus leucocephalus: No Effect. The project impact area is approximately 7 miles from the South Fork Edisto River and six miles from the North Fork Edisto River. No suitable nesting trees or individuals were observed within or near the project site.

Dryobates borealis: No Effect. Red-cockaded woodpecker habitat consists of mature (30 years or older) pine tree stands with little or no midstory. The project site is primarily bottomland and

riparian hardwoods with mixed hardwoods in the adjacent uplands. No habitat or nesting cavities were observed.

Insects

Danaus plexippus: At this time, the Monarch butterfly is proposed for federal listing as Threatened. Monarch butterflies use a variety of habitats that support flowering herbaceous plants and require milkweed for reproduction. No individuals or milkweed were observed. When listing becomes final, the project will be further evaluated for potential effects on the species and consultation will be initiated if required.

Plants

Oxypolis canbyi: No effect. Canby's dropwort is found in a variety of Coastal Plain habitats prone to long periods of inundation, including pond cypress ponds, grass-sedge dominated Carolina bays, wet pine savannas, shallow pineland ponds and cypress-pine swamps or sloughs. Known soil types that support this species are Rembert loam, Portsmouth loam, McColl loam, Grady loam, Coxville fine sandy loam, and Rains sandy loam. Historically, fire prevented kept sites open and prevented competition from other species. This site does not contain any of the soil types known to support Canby's dropwort.

Results

No federally threatened, endangered, or otherwise protected species or their habitats were observed in the project area. Based on the results, no current federally protected species will be adversely affected by the proposed project.

United States Department of the Interior

FISH AND WILDLIFE SERVICE

South Carolina Ecological Services 176 Croghan Spur Road, Suite 200 Charleston, SC 29407-7558 Phone: (843) 727-4707 Fax: (843) 727-4218

In Reply Refer To: 01/13/2025 14:07:16 UTC

Project code: 2025-0040816

Project Name: S-1210 Over Tampa Creek

Subject: Consistency letter for 'S-1210 Over Tampa Creek' for specified federally threatened

and endangered species and designated critical habitat that may occur in your proposed project area consistent with the South Carolina Ecological Services Field Office (ESFO) Determination Key (DKey) for project review and guidance for

federally listed species.

Keith Walker:

The U.S. Fish and Wildlife Service (Service) received on **January 13, 2025** your effect determination(s) for the 'S-1210 Over Tampa Creek' (the Action) using the South Carolina ESFO DKey for project review and guidance for federally-listed species within the Information for Planning and Consultation (IPaC) application. The Service developed this application in accordance with the Endangered Species Act of 1973 (ESA) (87 Stat. 884, as amended; 16 U.S.C. 1531 et seq.).

Based on your answers and the assistance of the Service's South Carolina ESFO DKey, you made the following effect determination(s) for the proposed Action:

Species	Listing Status	Determination
Canby's Dropwort (Oxypolis canbyi)	Endangered	No effect
Red-cockaded Woodpecker (<i>Dryobates borealis</i>)	Threatened	No effect

Consultation Status

Your agency has met consultation requirements for the species listed above by informing the Service of the "no effect" determinations. No further consultation for this project is required for these species. This consistency letter confirms you may rely on effect determinations you reached by considering the South Carolina ESFO DKey to satisfy agency consultation requirements under Section 7(a) (2) of the Endangered Species Act of 1973 (87 Stat. 884, as amended 16 U.S.C. 1531 et seq.; ESA).

The following species and/or critical habitats may also occur in your project area and **are not** covered by this conclusion:

• Monarch Butterfly *Danaus plexippus* Proposed Threatened

Please note that due to obligations under the ESA, potential impacts of this project must be reconsidered if: (1) new information reveals impacts of this identified action may affect any listed species or critical habitat in a manner not previously considered; (2) this action is subsequently modified in a manner which was not considered in this assessment; or (3) a new species is listed or critical habitat is designated that may be affected by the identified action. If any of the above conditions occurs, additional consultation with the South Carolina ESFO should take place before project changes are final or resources committed.

Bald and Golden Eagle Protection Act (BGEPA): Bald and golden eagles are not included in this section 7(a)(2) consultation and this information does not constitute a determination of effects by the Service. The Service developed the <u>National Bald Eagle Management Guidelines</u> to advise landowners, land managers, and others who share public and private lands with bald eagles when and under what circumstances the protective provisions of the BGEPA may apply to their activities. The guidelines should be consulted prior to conducting new or intermittent activity near an eagle nest.

If the Federal Action may impact bald or golden eagles, additional coordination with the Service under the Bald and Golden Eagle Protection Act (BGEPA) (54 Stat. 250, as amended, 16 U.S.C. 668a-d) may be required. Please contact Ulgonda Kirkpatrick (phone: 321/972-9089, e-mail: ulgonda_kirkpatrick@fws.gov) with any questions regarding potential impacts to bald or golden eagles.

Action Description

You provided to IPaC the following name and description for the subject Action.

1. Name

S-1210 Over Tampa Creek

2. Description

The following description was provided for the project 'S-1210 Over Tampa Creek':

Emergency culvert replacement over Tampa Creek. Washed out culvert to be replaced with a bridge over Tampa Creek.

The approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/@33.5598631,-81.22244061439937,14z

Project code: 2025-0040816

QUALIFICATION INTERVIEW

1. Does the proposed project involve research or other actions that include the collection, capture, handling, or harassment of any individual federally listed threatened, endangered or proposed species?

No

2. Is the action authorized, funded, or being carried out by a Federal agency? *Yes*

3. Are you the Federal agency or designated non-federal representative?

Yes

4. Is the project an existing structure that requires maintenance, repair, or replacement? *Yes*

5. Will all project take place within the existing structure's footprint? *Yes*

6. Does the project intersect the red-cockaded woodpecker AOI?

Automatically answered

Yes

7. Is the action area located within suitable Red-cockaded woodpecker <u>foraging habitat</u> (pine or pine/hardwood stands in which 50% or more of the dominant trees are pines and the dominant pine trees are 30 years of age or older or >10-inches diameter breast height (dbh) and the midstory height does not exceed 12 feet)?

No

8. Does the project intersect the Canby's dropwort AOI?

Automatically answered

Yes

9. Is there suitable habitat for Canby's dropwort located within the project area?

Note: Canby's Dropwort can be found in a variety of coastal plain habitats, including natural ponds dominated by pond cypress, grass-sedge-dominated Carolina bays, wet pine savannas, shallow pineland ponds and cypress-pine swamps or sloughs. The largest and most vigorous populations have been found in open bays or ponds that are wet throughout most of the year, but which have little or no canopy cover. Soils are sandy loams or acidic peat mucks underlain by clay layers which, along with the slight gradient of the areas, result in the retention of water.

No

Project Code: 2025-0040816

Project Name: S-1210 Over Tampa Creek

Subject: List of threatened and endangered species that may occur in your proposed project

location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2) (c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

Project code: 2025-0040816

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts, see https://www.fws.gov/program/migratory-bird-permit/what-we-do.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures, see https://www.fws.gov/library/collections/threats-birds.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit https://www.fws.gov/partner/council-conservation-migratory-birds.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Counties: Orangeburg County, South Carolina

ENDANGERED SPECIES ACT SPECIES

Project code: 2025-0040816

There is a total of 3 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

1. <u>NOAA Fisheries</u>, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

CRITICAL HABITATS

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

YOU ARE STILL REQUIRED TO DETERMINE IF YOUR PROJECT(S) MAY HAVE EFFECTS ON ALL ABOVE LISTED SPECIES.

USFWS NATIONAL WILDLIFE REFUGE LANDS AND FISH HATCHERIES

Any activity proposed on lands managed by the <u>National Wildlife Refuge</u> system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS OR FISH HATCHERIES WITHIN YOUR PROJECT AREA.

BALD & GOLDEN EAGLES

Bald and Golden Eagles are protected under the Bald and Golden Eagle Protection Act ² and the Migratory Bird Treaty Act (MBTA) ¹. Any person or organization who plans or conducts activities that may result in impacts to Bald or Golden Eagles, or their habitats, should follow appropriate regulations and consider implementing appropriate avoidance and minimization measures, as described in the various links on this page.

- 1. The Bald and Golden Eagle Protection Act of 1940.
- 2. The Migratory Birds Treaty Act of 1918.
- 3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

THERE ARE NO BALD AND GOLDEN EAGLES WITHIN THE VICINITY OF YOUR PROJECT AREA.

MIGRATORY BIRDS

The Migratory Bird Treaty Act (MBTA) ¹ prohibits the take (including killing, capturing, selling, trading, and transport) of protected migratory bird species without prior authorization by the Department of Interior U.S. Fish and Wildlife Service (Service). The incidental take of migratory birds is the injury or death of birds that results from, but is not the purpose, of an activity. The Service interprets the MBTA to prohibit incidental take.

- 1. The Migratory Birds Treaty Act of 1918.
- 2. The Bald and Golden Eagle Protection Act of 1940.
- 3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the "Probability of Presence Summary" below to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Brown-headed Nuthatch <i>Sitta pusilla</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/9427	Breeds Mar 1 to Jul 15
Chimney Swift <i>Chaetura pelagica</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9406	Breeds Mar 15 to Aug 25
Chuck-will's-widow <i>Antrostomus carolinensis</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/9604	Breeds May 10 to Jul 10
Eastern Whip-poor-will <i>Antrostomus vociferus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/10678	Breeds May 1 to Aug 20

NAME	BREEDING SEASON
Grasshopper Sparrow <i>Ammodramus savannarum perpallidus</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/8329	Breeds Jun 1 to Aug 20
Painted Bunting <i>Passerina ciris</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/9511	Breeds Apr 25 to Aug 15
Prothonotary Warbler <i>Protonotaria citrea</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9439	Breeds Apr 1 to Jul 31
Red-headed Woodpecker <i>Melanerpes erythrocephalus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9398	Breeds May 10 to Sep 10
Swallow-tailed Kite <i>Elanoides forficatus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/8938	Breeds Mar 10 to Jun 30
Wood Thrush <i>Hylocichla mustelina</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9431	Breeds May 10 to Aug 31

PROBABILITY OF PRESENCE SUMMARY

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read "Supplemental Information on Migratory Birds and Eagles", specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Green bars; the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during that week of the year.

Breeding Season (**•**)

Yellow bars; liberal estimate of the timeframe inside which the bird breeds across its entire range.

Survey Effort (|)

Vertical black lines; the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps.

No Data (–) A week is marked as having no data if there were no survey events for that week.

WETLANDS

Impacts to <u>NWI wetlands</u> and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local <u>U.S. Army Corps of Engineers District</u>.

Please note that the NWI data being shown may be out of date. We are currently working to update our NWI data set. We recommend you verify these results with a site visit to determine the actual extent of wetlands on site.

South Carolina Department of Transportation Location and Hydraulic Design of Encroachments on Floodplains Checklist

23 CFR 650, this regulation shall apply to all encroachments and to all actions which affect base floodplains, except for repairs made with emergency funds. Note: These studies shall be summarized in the environmental review documents prepared pursuant to 23 CFR 771.

l.	PROJECT DESCRIPTION							
	S-1210 Emergency Bridge replacement of a damaged culvert for Tampa Creek in Orangeburg County.							
A.	Narrative Describing Purpose and Need for Project a. Relevant Project History: b. General Project Description and Nature of Work (attach Location and Project Map): c. Major Issues and Concerns:							
	Culvert has been damaged from the 11/07/2024 storm (Orangeburg County Storm) and is no longer safe or functional. Route is currently closed to traffic and a detour is in place. Repair under emergency funds.							
B.	Are there any floodplain(s) regulated by FEMA located in the project area? Yes No							
C.	Will the placing of fill occur within a 100-year floodplain? Yes No							
D.	Will the existing profile grade be raised within the floodplain?							
	Yes. There is a potential grade raise but there is no FEMA floodplain.							
E.	If applicable, please discuss the practicability of alternatives to any longitudinal encroachments.							
	Longitudinal encroachments should retain within SCDOT right of way.							
F.	Please include a discussion of the following: commensurate with the significance of the risk or							

support base floodplain development:

environmental impact for all alternatives containing encroachments and those actions which would

		No risks are anticipated
		No risks are anticipated.
	b.	What are the impacts on the natural and beneficial floodplain values?
		SCDOT No Impact should be achieved.
	C.	What measures were used to minimize floodplain impacts associated with the action?
		Bridge or culvert will be designed to achieve no impact criteria.
	d.	Were any measures used to restore and preserve the natural and beneficial floodplain values impacted by the action?
		Bridge or culvert will be designed to achieve no impact criteria.
		liscuss the practicability of alternatives to any significant encroachments or any support of tible floodplain development.
N	o end	croachments are anticipated.
de ma	termir anage	cal, state, and federal water resources and floodplain management agencies consulted to be if the proposed highway action is consistent with existing watershed and floodplain ment programs and to obtain current information on development and proposed actions in sted? Please include agency documentation.
		lysis for the project will be performed in accordance with SCDOT, FEMA, cal regulations.
