Beth,

The size of the line was 5 pair drop. This served the house at 204 Timms Mill.

Thanks, Larry

Great. Thank you, Larry.

Are you able to provide any records or a statement as to the size of the line? We'd like to gather as much information as possible for our records.

Thanks again.
Beth

Beth,

We did have a conduit attached to the old bridge on Timms Mill Road with a service wire inside.

Thanks,
Larry Black

Subject: as-built / records request - SCDOT bridge replacement

Good morning, Larry and Mark.

Angelo Hines gave me your contact information regarding gathering as-built records for AT&T facilities. We are assisting SCDOT on two bridge replacements, one on Smithford Road over Mud Creek in York County; the other on Timms Mill Road over Six&Twenty Creek in Anderson County. We have been tasked with utility records research to aid SCDOT in an accurate design of these bridge replacements. Our SC811 one-call request indicated AT&T may have facilities on both sites. I've attached Google Earth .kml files for each location. Any records you can provide for these bridge projects is greatly appreciated. If you have any questions about anything, please call me at (843) 769-7379 ext 1618.

Thank you.
Beth
